Education

- Lokmanya Tilak College of Engineering, Navi Mumbai CGPA: 7.33 | 2021 -2025
CSE (AIML) | University of Mumbai
- SVM College, Pen, Maharashtra | HSC (Class XII) 84 % | 2020 - 2021
- Carmel High School, Pen , Maharashtra | SSC (Class X) 89.4% | 2018 - 2019

Skills

- Programming:** Python, Java, SQL, Javascript
- Machine Learning:** Supervised learning (Classification, Regression), Model training & Evaluation, EDA, Deep Learning (ANN/CNN), Pandas & NumPy, Model Evaluation (Accuracy, Precision, Recall, F1-Score)
- Frameworks & Libraries:** React.js, Scikit-learn, TensorFlow, PyTorch, Django
- Generative AI:** LLM integration (Gemini AI, OpenAI), RAG, Prompt engineering
- Databases:** MongoDB, PostgreSQL, MySQL
- Cloud & Tools:** Google Cloud Platform (Cloud Functions, App Engine, Compute Engine, API Gateway - hands-on via labs), AWS (EC2, S3), MongoDB Atlas, Oracle Cloud, Docker, Git

Projects

AI Mock Interview Web Application | [\[Live Demo\]](#)

- Built an AI-based interview platform that generates job-specific questions and records user responses via webcam and audio.
- Integrated Gemini AI to analyze responses, provide contextual feedback and progress tracking, with user authentication through Google Sign-In using Clerk.
- Technologies & Methods:** Next.js, PostgreSQL, Gemini AI, Clerk

Invoice Generator Web Application | [\[Live Demo\]](#)

- Built a full-stack invoice generator that allows users to create, preview, and download professional invoices with customizable templates and client data management
- Integrated secure user authentication and session management using Clerk, with seamless PDF export functionality for reliable invoice downloads
- Technologies & Methods:** React.js, Spring Boot, MongoDB, Clerk

Heart Disease Prediction Website | [\[Github\]](#)

- Developed a Python-based Django web application to predict heart disease risk using user-provided health parameters, displaying personalized assessment results and enabling users to reach out via a contact page..
- Implemented Logistic Regression for classification and integrated Django with MySQL for secure data handling, server-side validation, and reliable model inference within a responsive interface.
- Technologies & Methods:** JavaScript, Python Django, MySQL, Logistic Regression

Certifications & Training

- Oracle Cloud Infrastructure AI Foundations Associate** (Issued by Oracle University, 2025)
Gained hands-on experience with AI and ML fundamentals, Generative AI, LLMs, and Deep Learning, using Oracle Cloud tools and services.
- Google Cloud Skills Boost (2024)**
Completed 14+ hands-on skill badges covering GenAI (Gemini), Pub/Sub, Compute Engine, and API-based cloud services, etc.
- IBM SkillsBuild – Data Analytics Virtual Internship** (June 2023 – July 2023)
Completed an industry-aligned data analytics program focused on data visualization, exploratory data analysis, and Python-based insights generation.
